- SQL (MySQL)
- Power BI
- DAX
- Python
- NumPy
- OpenPyXL
- Database Design & Normalization
- Data Cleaning & Transformation
- Data Analysis
- Data Visualization
- Dashboard Development

PROJECT

Sales Performance Dashboard | Power BI

- Interactive business dashboard created using Power BI for analyzing sales performance, KPIs, profit trends and customer insights.

E-Commerce Analytics Database | SQL

- SQL-based E-Commerce Analytics project designed for analyzing sales performance, customer behavior, top products, and revenue insights using SQL queries and dashboards.

Finance Performance Dashboard | Power BI

- Interactive Finance Dashboard created using Power BI and Excel for analyzing revenue, expenses, profit margins, budget tracking, and financial performance insights.

HR Analytics Dashboard | Power BI

- Interactive HR Analytics Dashboard built using Power BI and Excel for analyzing employee attrition, workforce performance, job satisfaction, salary insights, and department-wise analytics.

Excel Automation Tool | Python

- Developed an Excel Automation solution using Python, Pandas and OpenPyXL to automate data cleaning, reporting, formatting and Excel file generation.

ERP Management Database System | MySQL

- Designed and developed a complete ERP database system for managing employees, inventory, sales, customers, suppliers, and reporting. Built using MySQL and analytical SQL queries

Portfolio & GitHub

- Additional dashboards, SQL projects, Python automation tools, and analytics work are available in my portfolio.
